

Biochar can be pyrolysed from a variety of natural carbon sources

BIO-CHAR WORKSHOP

Facilitated by experienced practitioner, **Mark Williamson**
in collaboration with RegenAction and S.H. Landcare

TWO-PART INTERACTIVE DEMONSTRATION:

- **THREE** different methods of pyrolysing a variety of woody materials into charcoal which will then be inoculated with beneficial soil organisms to make it into the resulting **BIO-CHAR**.
- **Demo:** Compost-making process creating inoculant for Biochar

***BENEFITS: Improved productivity in our soils AND
Creation of nutrient-dense food***
